Who we are

The Department of Government Services (DGS) was established on 1 January 2023 to improve everyone's experience of doing business and interacting with the Victorian government.

We bring important day-to-day services together in one department to make things easy and seamless for Victorians and businesses.

We are doing this by connecting and digitising our systems and platforms across state and local government as well as streamlining our corporate and procurement services.

You can find out more about our Ministers, leadership and entities here: [Department of Government Services](#).

DGS upholds and demonstrates the values of the VPS and is the embodiment of VPS leadership. DGS' values are adopted from the *Public Administration Act 2004*:

- Leadership
- Integrity
- Responsiveness
- Impartiality
- Accountability
- Respect
- Commitment to Human Rights.

The Technology and Digital Platforms Division

The Technology and Digital Platforms division is responsible for the design, build and run of the solutions and technology required to deliver on the department's objective to accelerate digital transformation. This includes accountability for managing enabling infrastructure and networks, as well as for designing and deploying business and customer platforms that are modular, scalable and reusable.

About the role

As a Principal Salesforce Developer, you will provide technical leadership in the design, development, and optimisation of solutions across our Salesforce ecosystem. Leveraging deep expertise in Salesforce architecture and development, you will guide teams in translating complex business needs into strategic, scalable technical solutions. Your leadership will help shape best practices across customisation, integration, and automation, ensuring high-quality outcomes. Additionally, you will drive continuous platform improvement, mentor team members, and stay at the forefront of Salesforce innovation and trends.

Key Accountabilities

1 Lead Design and Development of Salesforce Solutions

- a. Work with Product, Architecture, and senior stakeholders to define strategic technical approaches
- b. Design and develop complex, scalable solutions across multiple Salesforce instances
- c. Champion best practice development and architectural standards
- d. Lead the modernisation, support, and upgrade of key Salesforce systems

2 Quality Assurance and Governance

- a. Oversee technical quality through code reviews, solution walkthroughs, and best practice adoption
- b. Guide teams in implementing robust testing strategies in collaboration with Quality Engineers

3 Technical Leadership and Mentoring

- a. Mentor and coach developers at all levels
- b. Define and maintain technical standards, development guidelines, and architectural principles
- c. Lead technical design sessions and oversee solution delivery

4 Strategic Collaboration

- a. Act as a key technical liaison across product, business, and platform stakeholders, demonstrating strong business acumen to align technical solutions with organisational objectives
- b. Collaborate with Enterprise and System Architects to ensure alignment with broader digital strategies

5 Documentation and Knowledge Management

- a. Drive the creation of technical documentation and reusable assets
- b. Ensure documentation supports future scalability and cross-team understanding

6 Production and Platform Oversight

- a. Lead resolution of critical production issues
- b. Drive platform stability, performance, and long-term scalability initiatives

7 Deployment and CI/CD (GitHub)

- a. Design, implement, and maintain robust CI/CD pipelines using GitHub Actions or other GitHub-integrated tools
- b. Ensure code is automatically tested, reviewed, and deployed through structured workflows from development to production
- c. Champion best practices in version control, branching strategy, and deployment automation

Key selection criteria

1. Extensive (8+ years) experience in designing and implementing complex Salesforce solutions across multiple instances, with deep knowledge of platform best practices and architecture
2. Expertise in driving development standards, deployment strategies, and quality assurance across Salesforce development teams
3. Advanced problem-solving skills – able to lead the resolution of complex technical and architectural challenges
4. Proven leadership in mentoring and developing team members across multiple levels of experience
5. Confident and nuanced communication and influencing skills – able to engage confidently with senior leaders, architects, and delivery teams
6. Strong stakeholder engagement and alignment skills – able to work across business and technical domains to drive strategic outcomes

Qualifications & Experience

1. Extensive demonstrated expertise in Salesforce development across multiple instances, including deep knowledge of Salesforce development best practice, Apex, LWC, OmniStudio, and Salesforce platform-level architecture
2. Strong experience integrating Salesforce with external systems using REST/SOAP APIs.
3. Solid experience across core Salesforce Clouds (Sales Cloud, Service Cloud, Public Cloud) and proven delivery skills in Experience Cloud
4. Advanced Salesforce certifications aligned to your areas of specialisation (e.g. Application Architect, System Architect, or equivalent)
5. Proven experience leading and optimising delivery across the SDLC in complex agile environments, including shaping technical strategy and standards

What we can offer

You will have the exciting and rare opportunity get involved in building a modern and innovative government department, that will transform government services. You will be working with a growing team of enthusiastic professionals with highly skilled leaders in an environment that will support your growth and development. You'll also be able to build connections across the Victorian Public Sector.

DGS is a diverse and inclusive workplace and is committed to providing flexible working arrangements.

DGS is committed to supporting our employees balance their work and life commitments. All roles at DGS can be worked flexibly. DGS recognises that providing flexible working arrangements is not only important to our employees but also underpins a diverse, inclusive, adaptive, and high-performing workforce. The nature and scope of flexible options available will depend on the nature of the position. Applicants are encouraged to discuss flexible arrangements with the hiring manager during the recruitment process.

Additional information

- Preferred applicants may be asked to provide evidence of their qualifications.
- Applicants must be an Australian Citizen, Permanent Resident or hold a valid work visa.
- Successful applicants will be required to provide proof of identity and submit a national police records check.
- Re-employment restrictions apply to recipients of Victorian Public Service voluntary departure packages.
- Non-VPS applicants will be subject to a six-month probation period.
- All staff must comply with the Code of Conduct for Victorian Public Sector Employees.
- Terms and conditions for department employees are subject to the Victorian Public Service Enterprise Agreement 2024.

Diversity and Equal Employment Opportunity

We are an equal opportunity employer and welcome applicants from a diverse range of backgrounds and experiences, including Aboriginal and Torres Strait Islander people, people from culturally and linguistically diverse backgrounds, people from the LGBTIQ community and people with disability.

It is important to us that candidates with disability can participate equitably in the recruitment process. If you need assistance or adjustments to fully participate in the application or interview process or if you have any enquiries about diversity and inclusion at DGS, please contact the Department's Diversity and Inclusion team currently supported by the Department of Premier and Cabinet, on 0409 926 200 or matthew.r.parker@dpc.vic.gov.au.

We respect people's privacy. DGS collects and handles personal information consistent with the requirements of the Privacy and Data Protection Act 2014.

COVID-19 vaccination

The department is committed to providing and maintaining a working environment which is safe and without risk to the health of its employees and clients and consistent with the department's obligations under the Occupational Health and Safety Act 2004 (OH&S Act). To support this DGS has a COVID-19 Vaccination policy which strongly recommends all DGS employees be fully vaccinated.

Occupational health and safety responsibilities

Managers are responsible for the day-to-day implementation of OHS programs in their designated workplace, which includes the following areas as detailed Section 21 of the *Occupational Health and Safety Act 2004*:

- induction, instruction, training, and supervision of employees and contractors
- provision of relevant OHS information, overseeing storage and maintenance of plant, equipment, or substances
- ensuring the safety of visitors.
