

MECCA

Job Title:	Salesforce Administration Developer
Department:	Loyalty
Location:	MECCA BRANDS Support Centre
Reports to:	Technology Manager – Service & Loyalty
Direct Reports:	None
POSITION SUMMARY AND PURPOSE	
The Salesforce Administration Developer – Service & Loyalty Cloud is responsible for administering, maintaining, and enhancing the Salesforce platform while also acting as a trusted advisor to business stakeholders. This role is a hands-on member of MECCA’s Salesforce platform team, responsible for configuring, maintaining, and enhancing our Salesforce Service Cloud and Loyalty Cloud solutions that support our customer care and loyalty experiences. The role is responsible for developing and maintaining any custom code and managing the deployment pipeline. This role ensures Salesforce remains stable, secure, and efficient, while driving continuous improvement by understanding requirements and designing, building and delivering solutions.	
ESSENTIAL FUNCTIONS AND RESPONSIBILITIES	
Loyalty Cloud Expertise • Configure and maintain Loyalty Cloud programs, including point/credit accrual and redemption rules, benefits, and member management. • Build and optimise loyalty program processes (promotions, vouchers) to drive member engagement and retention. • Manage loyalty member data quality, segmentation, and integration with downstream systems. • Monitor loyalty program performance and transaction processing, resolving exceptions and reconciliation issues. • Collaborate with business stakeholders to translate loyalty and CRM requirements into scalable platform solutions. Custom Development (LWC, Apex & Automation) • Design, build, and maintain Lightning Web Components (LWC) to deliver custom user experiences and interfaces. • Develop and maintain Apex classes, triggers, batch jobs, and asynchronous processes following best-practice patterns. • Build and consume REST/SOAP APIs and platform events to support integrations across Loyalty Cloud, Service Cloud, and external systems. • Write and maintain unit tests, ensuring appropriate code coverage and adherence to governor limits. • Conduct code reviews, enforce coding standards, and manage technical debt across the codebase. • Balance declarative (flows, configuration) and programmatic solutions, selecting the right approach for maintainability and performance. Service Cloud Expertise • Configure and optimise Case Management, including assignment rules, escalation rules, and queues. • Manage Omni-Channel routing for phone, email and chat. • Build and maintain the Service Console (apps, macros, quick text) to improve agent efficiency. • Implement and support Knowledge Base management and governance. • Configure and manage Entitlements, SLAs, and Milestones to support customer service operations. • Analyse and optimise customer service processes to enhance agent productivity and customer experience. • Develop and review Apex code, validation logic, and Apex triggers to extend Service Cloud capabilities. Stakeholder Engagement & Delivery Management • Provide regular updates to stakeholders, ensuring they are informed on issues, impacts, and upcoming changes. • Technical SME in discovery workshops and process-mapping sessions with business units. • Support CI/CD deployments for Salesforce and related systems. • Coordinate with integration and other internal teams to troubleshoot and deliver enhancements. Delivery, Support & Continuous Improvement	

- Own work from idea to production. Pick up backlog items, clarify requirements with the team, estimate effort, build, test, and support deployment.
- Provide Level 2/3 support. Triage and resolve Salesforce incidents and requests that cannot be handled at Level 1; contribute to incident reviews and root-cause fixes.
- Champion platform best practice. Identify opportunities to simplify configuration, reduce technical debt, and improve performance and maintainability across both declarative and custom code.
- Keep across key Salesforce releases and features relevant to Service Cloud, Loyalty Cloud, and the Lightning platform; suggest and trial features that could add value.

Platform Health & Stability

- Administer Salesforce environments (user management, profiles, roles, permission sets, security reviews).
- Conduct org security reviews, bi-annual user audits, and platform health checks.
- Manage Salesforce releases and rollouts, ensuring business readiness.
- Maintain data accuracy, quality, and governance across Salesforce and integrated systems.
- Monitor integrations (e.g., Amazon Connect, Marketing Cloud, ERP, Loyalty Cloud) and resolve exceptions.
- Provide Level 2/3 support for incidents, lead incident post-mortems, and maintain knowledge bases for L1 support.
- Oversee backup, retention, and recovery strategies.

CORE COMPETENCIES

Required:

- ~2–4 years' experience as a Salesforce Administrator, Salesforce Admin/Developer, or similar hands-on Salesforce role.
- Hands-on experience with Salesforce Loyalty Cloud / Loyalty Management (tiers, accrual/redemption rules, benefits, member management).
- Hands-on expertise with Service Cloud (case management, omni-channel, knowledge base, entitlements/SLAs, console customisation).
- Custom development experience with Apex (classes, triggers, batch/asynchronous processing) and Lightning Web Components (LWC).
- Strong understanding of Salesforce configuration, automation (flows, workflow rules, process builder), and data management, with sound judgement on when to use declarative vs programmatic solutions.
- Experience writing unit tests and working within Salesforce governor limits and best-practice coding patterns.
- Ability to triage and remediate issues.
- Proficiency in SOQL, SOSL, Apex, and Salesforce platform tools.
- Familiarity with CI/CD tools (Bitbucket, Azure pipelines).
- Understanding of Salesforce integrations (e.g., CTI, Amazon Connect, ERP, Marketing systems), including REST/SOAP APIs and platform events.
- Strong analytical and problem-solving skills, with a customer-first mindset.
- Excellent communication skills, able to explain technical topics to non-technical stakeholders.
- Highly organised, with the ability to manage competing priorities and deadlines.

Highly desirable:

- Salesforce Administrator ADM201 certification (or equivalent experience).
- Salesforce Platform Developer I (PD1) certification (or equivalent experience).
- Experience with Salesforce Marketing Cloud or other Salesforce clouds.
- Exposure to modern contact centre tools (e.g. Amazon Connect or other CTI/digital engagement platforms).
- Experience working in an agile product / squad environment.
- Experience configuring & maintaining Salesforce Einstein solutions, including but not limited to Einstein Bots, Next Best Action.

CORE VALUES

All MECCA Brands employees are expected to live the Company Values:

1. Treat others with Respect and courtesy
2. Be positive and energetic at all times
3. Take Responsibility
4. Do Whatever it takes
5. Take pride in all that we are and do

MECCA Brands is a rapidly growing business and therefore this role may expand and evolve to include additional responsibilities not mentioned above that are related to meeting the needs of the business going forward.

EMPLOYEE REVIEW

I have read the above and understand that it is intended to describe the general content and requirement for performing this position. It is not an exhaustive list or statement of responsibilities, duties or tasks. I understand that this job description does not preclude my managers authority to add or change responsibilities and duties, and I understand that the performance of other duties will be required from time to time in order to meet the Company's' needs. I have been given a copy of this job description.
