Re: IT Manager – Fixed-Term Contract

Dear Hiring Team,

I am writing to apply for the interim IT Manager opportunity advertised by Marlow Recruitment. With more than 30 years' experience across systems engineering, enterprise platforms, architecture and complex technology delivery, I offer the hands-on technical depth and pragmatic leadership needed to step into an existing environment quickly, maintain continuity and work directly with senior stakeholders.

Salesforce is a particular strength. At Origin Energy, I provided hands-on technical leadership across Sales and Service Cloud, including configuration, Flow, Apex, integrations, data validation, release coordination and production defect resolution. I also established a Salesforce DevSecOps capability, transformed an unstructured release process into a hybrid automated pipeline, and led optimisation work that resolved 90% of reported incidents. In community organisations, I designed, deployed and administered Salesforce NPSP, Sales Cloud and Service Cloud solutions, built reports and operational applications, and coached administration teams to become self-sufficient.

My broader background aligns well with the role's Microsoft and operational responsibilities. I have delivered solutions using Power Apps and SharePoint Lists, integrated Microsoft APIs and productivity tools, automated reporting across multiple enterprise platforms, and supported business-critical CRM environments. I am comfortable moving between strategic planning, architecture, vendor and stakeholder coordination, and day-to-day troubleshooting. Throughout my career I have worked closely with business leaders, project teams, end users and external vendors to translate operational needs into reliable, practical solutions under tight timeframes.

Based in Melbourne, I would welcome the opportunity to help your client maintain stable, secure and well-supported systems during this interim period. I would be pleased to discuss how my Salesforce expertise, Microsoft platform experience and hands-on delivery approach could contribute from the outset.

Kind regards,

Efraim Taranto
